Col. C. C. Pratt, by his dignified, gentlemanly canvass, is making votes wherever he goes. His clean cut character as a man, his quiet, earnest work during his first term in Congress during which he secured one more pension for the old soldiers than George W. Kipp did, although the latter proclaimed his achievements in this line from the house top, has won for Pratt the support of the G. A. R. The only charge that can be brought against Pratt is that he voted faithfully with his party and thereby secured protection for the farmer and workingman. To do this is a crime in the estimation of the Free Trade Democrats. Pratt's election is assured, as everyday evidence is being received of his growing popularity. Republicans, Independents and Democrats realize that he will make a safe and sane representative.

WOMAN AVIATOR IN TUMBLE.

Pluckily Remarks She Will Begin Construction of Another Machine.

Mineloa, N. Y., Oct. 13.—The gusty wind that swept over the aviation field here wrecked two aeroplanes and tumbled one woman aviator and one manbird to the ground. Neither of the victims was hurt, but they will have to get new machines.

Mrs. Bessie Raiche, wife of Franz Raiche, head of the First American Aeroplane company, started up in a machine made by herself and modeled on the Curtiss aeroplane. She soared to a height of twenty feet and was getting along bravely when a treacherous gust caught her machine and tipped it till the right wing touched the ground.

The weight of the engine caused the wing to crumple and the aeroplane turned over on the left wing, ruining that one also.

Mrs. Raiche tumbled out of the machine from a height of six feet, but was not hurt and laughed merrily. She said she would at once begin the construction of another aeroplane.

Five minutes later Harry Harkness, in a big Antoinette monoplane, met with an accident exactly similar to that of Mrs. Raiche.

RATHER DIE THAN SURRENDER

Letter From Escaped Sing Sing Prisoner Seized by Police.

New York, Oct. 13.—Two letters written by Walter Brannigan, one of the five convicts who escaped from Sing Sing prison last Friday morning, have been seized by the White Plains police and turned over to Warden Frost.

One of the letters was sealed and the other was not. In the unsealed letter, which was addressed to his wife, Brannigan pleaded for \$200 and a suit of blue clothes, and said that he would rather kill himself than return to prison.

The contents of the sealed letter, which is addressed to a man in New York, are not known.

The letters were taken to White Plains by a man who had evidently seen the fugitive convicts or acted for a friend of the runaways.

ROOT MAY GET IT

ELECTION RESULTS AWAITED.

Chances For Appointment Depend Largely, It is Said, Upon Results In New York—No Definite Decision Has Been Reached Yet.

Washington, Oct. 13.—President Taft is considering United States Senator Root for appointment as chief justice of the supreme court. No decision has been reached yet by Mr. Taft in regard to the chief justiceship, but Senator Root is regarded by him at this time with as much favor as any other man.

There is good reason to believe that Mr. Root would accept the place if it were offered him.

This was learned on excellent authority. Senator Root's chances for appointment will depend largely, however, on the result of the coming election in New York state. If a Republican legislature is elected the senator's chances will be increased, for his appointment under any other circumstances would mean the surrender of his seat to the Democrats.

It would mean, too, that New York state would be represented in the senate by two Democrats, Senator Chauncey M. Depew's term expiring on March 4 next. It is understood that President Taft will wait until after the November election before settling the chief justiceship.

Senator Root called on the president at Beverly a day or two ago, but, as Mr. Taft's friends here understand it, nothing definite passed between them about Senator Root taking a place on the bench.

\$100 REWARD, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

COLUMBUS DAY.

The Knights of Columbus held a meeting on Wednesday evening at their rooms on Main street in honor of America's discoverer. It was also their regular meeting and the first degree was conferred on ten candidates, the exemplification of the degree being performed by the regular officers whose efficiency in their work made a most impressive and interesting ceremony. After the regular business had been finished the council took up the social features which had been prepared by a painstaking committee. The orator of the day Dr. W. T. McConville, was introduced and with "The Day we Celebrate" as his text made an address which was interesting and instructive from start to finish. The doctor is a ready talker, has a pleasant delivery and is at ease with his audience. After the speech refreshments were in order and those present sat down to a bountiful repast. The K. of C. orchestra furnished the music which was greatly enjoyed. Short addresses were made by Robert Murray, Chas. T. McKenna, Thos. J. Finerty, John Rickard and others, after which the meeting ended, all voting that they had a jolly good time.

AVIATOR HURT IN FALL.

Harry Ferguson May Die as Result of Tumble in Ireland.

Belfast, Ireland, Oct. 13.—A gust of wind overturned the monoplane of Aviator Harry Ferguson and hurled him thirty feet to the ground.

The heavy motor of the aeroplane fell on the flier, crushing him and inflicting wounds which will probably prove fatal.

OUR RABBIT SUPPLY.

Rabbits in Pennsylvania ought not to be protected by law. This state annually pays out much money for the advancement of agriculture. At the same time it legalizes the perpetuation of rabbits the most destructive pest with which farmers have to contend. The past year has been a particularly busy one for rabbits. During the deep snows of the winter they chewed the bark off the fruit trees as high as they could climb and as far down as they could dig. When spring opened they attacked the new wheat and watched the farmer plant his garden. When the peas were about ready to blossom the rabbits discovered how good they were and in several places of which report is made the farmers have been unable to raise peas. Young cabbage plants also attract the scavengers. Rabbits have increased very rapidly. Nearly every brushpile and tuft of grass conceal one or more of them. They have been protected by law until the number killed does not come anywhere near the number produced. It is unlawful for a farmer to kill a rabbit at this season and use the flesh for food. If he finds the rabbit in the actual destruction of crops he may shoot the animal but if he eats it he is liable to arrest and fine, even though the killing were in his own dooryard. There is little of justice in a law like that. It is framed, passed and maintained in the interests of men living in towns and cities, who later in the

year will go forth and shoot the rabbits. They will likewise shoot the farmers' stock and break down his fences and start fires in his woodlands. The time to kill a rabbit is when the animal is doing mischief. We are inclined to the belief that instead of protecting rabbits the state should encourage their extermination in the interests of agriculture. The rabbit, furthermore, belongs to the farmer and he should be privileged to kill for his own use whenever and wherever he pleases. The next legislature of Pennsylvania ought to make some drastic change in the statutes relating to the protection of rabbits, in order that the farmers might have a chance at least to protect themselves.

AMUSEMENTS.

"A Gentleman From Mississippi" will be presented here Tuesday evening, Oct. 18, by William A. Brady. This famous comedy drama was the laughing sensation of New York for more than two years, playing to crowded houses even on the most torrid and oppressive nights of the summer months. Those who have seen the piece say that there are more laughs and better fun in one act of it than in half of the comedies now on the road all put together. It is the merriest of all plays. And there is sentiment, too. Love scene after love scene, some of them mirth provoking and others filled with beautiful sentiment, abound in the play. There is a delightful southern atmosphere about it all that suggests the land of roses and the palmetto. The principle role, that of Senator Langdon, is played by Mr. James Lackaye, while Harry Stubbs, one of the most brilliant of our young comedians, is equally successful as the breezy young Yankee secretary. The same splendid company which has been appearing in the piece for the last six months in Chicago will be seen in the performance here.

WHEN THERE IS ILLNESS

In your family you of course call a reliable physician. Don't stop at that; have his prescriptions put up at a reliable pharmacy, even if it is a little farther from your home than some other store.

You can find no more reliable store than ours. It would be impossible for more care to be taken in the selection of drugs, etc., or in the compounding. Prescriptions brought here, either night or day, will be promptly and accurately compounded by a competent registered pharmacist and the prices will be most reasonable.
